Reasons for Allowance

Claims 1-2, 6-15, 17-27, 29-32 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Kong or Rovell, taken alone or in combination of other references, does not teach or fairly suggest a method or apparatus comprising, among other things, that wherein the decision switch is a diode (claim 1); wherein the transistor is coupled between a current mirror and the input (claim 6); wherein said current sink comprises a first transistor having a gate coupled to said input, and a second transistor having a gate coupled to said second output (13); a high voltage amplifier coupled to a transconductance stage, the transconductance stage having an output coupled to said input of said control circuit (claim 17); wherein the control circuit includes a second input, a second decision transistor coupled to the second output and enabling a current path to the first output, and a second current sink coupled to the second output (claim 18); detecting whether an output voltage is present at said second output; and steering the control current provided to said first output when said output voltage is below a threshold (claim 20); a first high voltage cascode mirror coupled to said first current steering switch and a second cascode mirror couple to said second current steering switch (26); and a micromachined mirror positioned adjacent to at least a first force pad and a second force pad; and a decision switch coupled to the current sink and enabling a current path from the transconductance stage to the

second output when a voltage present at said first output reaches a predetermined minimum level (claim 32), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
